## The Center for Advanced Security Training (CAST) Cryptography Deep Dive

The Center for Advanced Security Training (CAST), developed by EC-Council, was created to address the need for highly technical and advanced security training for information security professionals. CAST programs stand out from others through their methodical and extreme hands-on approach. These highly technical, labs intensive advanced security training workshops, led by renowned industry professionals, allow participants to acquire cutting edge technical skills, and the opportunity to combat real life scenarios.
